Loft

Rif: To 360

Loft with a strong contemporary impact designed by a well-known Turin architect. The property is located in a historic building, the former Officine Savigliano, the subject of a recent renovation and redevelopment which has preserved the identity of a workplace by adapting it to housing needs.

The property unfolds over two levels and has been renovated, emphasizing its character, maintaining visible structural details such as concrete walls and pillars, integrating them with light wood ceilings, full-height iron and glass windows, brightly colored walls. The skilful lighting accentuates the modern cuts of the spaces. On the ground floor it consists of a large open space with entrance, a guest bathroom, an eat-in kitchen, a living room and a dining area, all overlooking a suggestive planted terrace. A spectacular staircase leads to the upper floor where there is the sleeping area with two bedrooms, walk-in closets and private bathrooms.

The property includes a double panoramic terrace. Possibility of garage inside the residential complex.
